

Sierpe del Pacifico

Step any direction in Sierpe del Pacifico and adventure beckons.

Sierpe del Pacifico's trail system connects owners with the jungle, the river and the sea.

River/Mangrove Trail provides access to the banks and views of the Rio Sierpe boat dock and Rancho (reception area.) The path leads east to the river estuaries where kayak adventurers can launch into the wonders of this unique ecosystem.

Jungle Trail invites hikers to experience Costa Rica ... unspoiled. Enormous primary growth trees dripping with bromeliads and ferns, line the jungle paths, providing habitat for indigenous wildlife. Every adventure on the jungle trail is unique, as the rhythms of nature flow with the time of day.

Wetland Preserve Trail leads hikers on an adventure shared with howler and white-faced monkeys. Exotic ribbon trees and birds-of-paradise are striking displays of the natural diversity that is protected in this wetland preserve.
